ABOUT ME

I am a Computer Engineer graduated in 2016 at the University of Pinar del Río, Cuba. I have worked as a web developer in the last two years using both technologies Frontend as Backend, mainly Laravel, Symfony, Node.js and Angular. I like to contribute to make incredible things that's why I keep learning things new every day reading books, articles, with online training.

WORK EXPERIENCE

Frontend developer, tecdifferent - *October/2017 – January/2018 – Remote Work*

- Software engineer using Angular as main technology.
- Design of user interfaces.

Software Engineer, (GDAI) Computing Palace - *September/2016 - present – Computing Palace – Cuba, Pinar del Río.*

- Development Web applications for content management using Symfony and Laravel as main technologies
- Development of web applications for management and monitoring oriented to work with servers.
